## NWS Riverton Spotter Training Webinars

Each webinar session below covers the same material, so all are interchangeable. Please note these are not required to pass along weather information to our forecast staff, but they are helpful in learning to identify dangerous weather that could pose a threat to life or property.

### Session #1: April 2, 2024, 11:00 AM MDT

Please register at: <https://attendee.gotowebinar.com/register/4455714134920511064>

### Session #2: April 17, 2024, 4:00 PM MDT

Please register at: <https://attendee.gotowebinar.com/register/5359992080022143319>

### Session #3: May 10, 2024, 11:00 AM MDT

Please register at: <https://attendee.gotowebinar.com/register/5202743225552517976>

After registering, you will receive a confirmation email containing information about joining the webinar.

SKYWARN  
WEATHER.GOV

The National Weather Service relies on trained volunteers to supplement doppler radar information when flooding, severe storms, and tornadoes threaten. These dedicated individuals volunteer their time to learn about and identify severe weather. Their valuable reports are an important part of the warning process. Weather reports from trained spotters are used along with doppler radar data to issue warnings for tornadoes, severe thunderstorms, and flash floods.
