Hey Zach, TNX for getting on air tonight. It was nice to hear you! Far as I'm concerned, that rpt should just be left off! It's not used much now and isn't really needed! Does the phone patch still even work on it? We have enough rpts around here that don't see much use as it is anyway.

I liked the idea of the last SET. Think we should do more like that!(and with more groups) What do you tyof this part of the state being linked with Rawlins? I kinda like having them linked with the snowbird system. If we can help expand the range of that system I'm for it.

There used to be a statewide link system years ago. But the guy behind it got tired of doing everything by himself. So he just shut it down. Larry was having trouble getting folks to help keep it going. When this club just gave the rpts that were in 2m to the county, they sadly put an end to linking anything with their gear.
